

FÆLLES STYRKE

Alfix Pro Club is now up and running

On 18th May 2018 the new Alfix Pro Club gathered for the first time in Kolding with dedicated tile fixers from all parts of Denmark participating.

Current topics on the agenda

Club members listened with great interest to the first presentation about the new Alfix DuraTherm thermal insulation system for external walls followed by sealing around floor drainage given by Alfix employees Mikael Noe and Allan Nielsen. Inspiring guest speakers from the companies of Bunchs Bygningsfysik and Blücher also contributed to an informal and exciting day with learning and high spirits.

Membership advantages

Master fixer Martin Juul Wulff from M2 Byg in Dronninglund had the following experience of the club:

Why did you join the Alfix Pro Club?

“Definitely, because the basic idea sounded interesting – face-to-face contact between tile fixers and manufacturer in a closed forum of debate”.

Was the meeting worthwhile? And if yes, which subjects did you benefit from?

“Yes, most certainly. A number of different solutions for sealing of floor gullies as well as thermal insulation systems were discussed. It may not be that pleasant to discuss where and how some jobs went wrong. But I find it very

important to discover and realize why failures occurred! It is indeed preferable to learn from the mistakes made by others rather than to make them and pay for them yourself”.

Another participant, master fixer Henrik Burich from Haderslev says:

“My motivation for joining the Pro Club is the fact that I consider Alfix a very serious player in the Danish market”.

“I really did benefit a lot from the meeting as we tile fixers should share our experiences and pass them on to others”.

“It is important to gather new knowledge from the club and at the same time, it is positive to present the membership to our own clients demonstrating that we keep up with development within our profession. I am looking forward to the next meeting”.

Signing up for membership

Next Pro Club meeting is in Kolding on Friday 2nd November 2018 from 9-13.

Follow the link for free membership for tile fixers and brick layers: <http://www.alfix.com/proclub>.

Alternatively, send an email with request for membership to alfix@alfix.dk. Please include “Pro Club membership” in the subject line.

Information about the themes for the next session will be send out to all members in due time before the meeting.

With the launch of Alfix Pro Club, we intend to promote and optimize professional and skilled craftsmanship. On the basis of current topics and everyday cases we will jointly fortify craftsmanship within our trade to ensure even better future solutions. For the mutual joy and benefit to owners, tile fixers, merchants, specifiers and manufacturers.

New Danish thermal insulation system eases installation for the customer

“All-in-one system from Alfix – delivered at one time directly to the building site”

This is the mantra for our new Alfix DuraTherm which includes mineral wool insulation boards in 3 thicknesses: 50, 100 and 150 mm.

This system eases ordering and delivery of complete insulation packages for both craftsmen and merchants – by means of one single item no.

DuraTherm has been thoroughly tested at a well-acknowledged German institute with very satisfying results.

The facade system is available in 2 different versions – complete and select.

New employees

On 1st May 2018, two new employees had their first day of work at Alfix in Kolding. Mette Skov Jensen and Flemming Ilsøe may now be considered a part of Team Alfix with employment as laboratory technician and technical advisor, respectively. Mette left a position with Eurofins Miljø in Vejen and Flemming was previously employed with Isover in Vamdrup. We welcome them both on board a team which now has become even stronger with their employment.

Alfix pool succes continues

The number of Danish, Norwegian and Swedish pools applied with “inside” Alfix solutions is steadily rising. “The interest and support for the Alfix pool systems simply has been overwhelming. It covers everything from small, private owned pools, therapeutic pools in institutions and hospitals to public sports arenas and facilities at home and abroad. We work with a large number of solutions tailored both owner and the actual project” elaborates Carsten Schultz, Head of Technical Advisory Dep. at Alfix.

Currently, Alfix is part of many projects – both new build and renovation. And common to them all is the seriousness behind each and every solution intended for a long and durable life. The activity level for pools including Alfix products is very high, a fact backed by the following new references.

Have a nice summer!
